RETURN TO WORK WITH CONFIDENCE

In conjunction with the ASA NSC Meeting 2017 we are proud to offer the opportunity to attend the CRASH course.

The CRASH course is a one day return to work course which aims to help participants relearn practical skills and experience simulated anaesthetic critical events. It also aims to provide participants with the confidence to return to work with individualised advice on the day of the course.

The CRASH course includes ALS training, airway skill station, simulated critical incidents and problem based learning discussions on haemorrhage and paediatrics.

Enquiries: crashcourseaustralia@gmail.com
